Attorney Docket No.: 50623.352

## **IN THE CLAIMS**

- 1-43. (Canceled).
- 44. (Previously presented) A method of coating an implantable medical device, comprising:

adding a copolymer of an ethylene comonomer with a carboxylic acid comonomer to a solvent system to form a composition;

applying the composition to an implantable medical device; and allowing the solvent system to evaporate.

- 45. (Previously presented) The method of claim 44, wherein the carboxylic acid comonomer is selected from a group consisting of acrylic acid, methacrylic acid, maleic acid, itocanic acid, and esters thereof.
- 46. (Previously presented) The method of claim 44, wherein adding the copolymer to the solvent system further comprises neutralizing the copolymer in a volatile or a non-volatile base and dispersing the copolymer in water and/or a co-solvent.
- 47. (Previously presented) The method of claim 44, further comprising adding a therapeutic agent to the solvent system.
- 48. (Previously presented) The method of claim 44, wherein the solvent system comprises toluene.
- 49. (Previously presented) The method of claim 48, wherein the solvent system fur-

ther comprises a chlorinated solvent and a lower alcohol.

- 50. (Previously presented) The method of claim 44, wherein the carboxylic acid comonomer has a content in the copolymer no less than 5% by weight.
- 51. (Previously presented) The method of claim 50, wherein the carboxylic acid comonomer has a content in the copolymer no more than 50% by weight.
- 52. (Previously presented) The method of claim 44, wherein the carboxylic acid comonomer has a content in the copolymer no more than 50% by weight.
- 53. (Previously presented) The method of claim 44, wherein the co-polymer is ethylene acrylic acid.
- 54. (Previously presented) The method of claim 44, wherein the device comprises a stent.
- 55. (Canceled)
